

DFC SERIES WINDOW GUARD

FEATURES

- Rear passenger window guards, designed to provide the best strength, durability, and protection to windows
- Manufactured with HRPO steel
- Black textured powder coat for resistance against scratches and scuffs
- Mounting kit and hardware included
- Integrated housing for (2) MPS6U, lights sold separately
- Three-year warranty

Federal Signal is proud to announce the new DFC Series Window Guard.

The DFC Window Guard is engineered for superior strength and protection, purpose-built to reinforce and safeguard rear passenger windows against impact or intrusion. Constructed from high-quality HRPO (Hot Rolled Pickled and Oiled) steel, it delivers enhanced strength and consistency, while its durable black textured powder-coat finish resists scratches, scuffs, and environmental wear to maintain a professional appearance over time. Each unit includes a mounting kit and hardware package for streamlined installation with no additional components required. Additionally, the guard features integrated housing, designed to support two MicroPulse® Ultra 6 (MPS6U) units, enabling effortless perimeter lighting integration to improve on-scene visibility.
