

CONVERGENCE NETWORK

NEW FEATURES ADDED TO THE CONVERGENCE NETWORK CONFIGURATION SOFTWARE

Version 3.9.0.0 of the Convergence Network Configuration software is available today to download. This new version replaces the current version 3.8.0.8. The following new features have been added to the software.

New Features & Enhancements

- Separate amplifier models by family selection
- Separate lightbar models by family selection
- Separate lightbar device page models by family selection
- Add cruise I-IV for Vision
- "Play All" pattern option added for DynaFlare™
- Erased function added to device toolbar options
- Add FSJoin® 4-Channel Expansion Module EXPMOD4
- Add PA300-200 siren

Bug Fixes & Improvements

- Device version comparison to software firmware when user has no internet
- SignalMaster™ sync visibility for configuration that have configured
- Removed "Remote Handheld" from description under FSDirect® in interface splash screen
- Handled crashing when switching between CANDiag and Diag too quickly
- GUI no longer crashes by selecting "cancel" when opening .dis file
- Check added for devices in bootload before allowing users to update
