Federal Signal is excited to announce model FT400A-V, the newest Industrial VoIP IECEx – Zone 1 Hazardous Telephone in our telephony product line. Renowned for safety and durability, the FT400A-V is a rugged wall or desk mount industrial VoIP telephone that provides safe and reliable communication in potentially harmful environments. With IECEx ZONE 1, FCC, and ICES compliance, it is engineered with safety and durability in mind, even in the most dangerous situations.

Additionally, FT400A-V IECEx certified telephone is dust and corrosion-resistant, providing protection in atmospheres where a mixture of air and flammable substances in the form of gas, dust, vapor or mist are present frequently, continuously, or for long periods.

With additional certification through this new model, the FT Series expands to offer robust communication solutions that are crucial for protecting lives and maintaining operational continuity in industries where every second counts.
