

SSM SYNCHRONOUS STROBE MODULE UPDATE

Federal Signal is excited to announce a change to the SSM Synchronous Strobe Module. The SSM Module now offers expanded compatibility and greater flexibility to meet the evolving needs of your projects by supporting both strobe and LED devices. It is being built to support today's LED technology while maintaining proven strobe reliability. The updated SSM Module ensures consistent, synchronized signaling across all connected devices - delivering a clean, professional visual output that meets code requirements and elevates overall system performance.

Please take a moment to review the new instruction manual on our website, as it includes further information regarding this change.
