

X-PC AND X-PCS

PRICE INCREASE AND LEAD TIMES

Due to unprecedented market conditions, including increased manufacturing, component, and supply chain costs, pricing for PC, laptop, and server hardware will be increasing by 33% effective immediately.

PC and laptop Models affected: X-PCD1, X-PCD1T, X-PCLAP

Server Models affected: X-PCS1, X-PCS1T, X-PCS2, X-PCS2T

In addition, industry-wide supply constraints around memory and storage continue to impact product availability. As a result, lead times for newly ordered PCs and servers are currently extended, with many configurations not expected to be available until November.

To help minimize project delays, customers may choose to provide their own PC and server hardware for deployment, provided the equipment meets Federal Signal's approved hardware specifications. Detailed requirements can be found at:
